(54) DATA BASE STORAGE AREA ALLOCATION DEVICE

(57) Abstract:

PURPOSE: To provide a data base storage area allocation device which optimizes a data base area and which can easily manage the data base area.

CONSTITUTION: A data area use situation monitor part 10 inquires of DBMS 20 the use situation of the data base area, and informs a data base area allocation part 30 of the inquired result. When a notice result from the data area use situation monitor part 10 is that the data base area is used by exceeding a previously set threshold, the data base area allocation part 30 transmits information for allocating a storage area corresponding to a previously set data unit stored in a set value storage part 40 to DBMS 20. DBMS 20 allocates data to the data base area based on received information.
